

ETA CHAPTER REPORT **JUNE 2017**

The Summer is already upon us and as we prepare to take off on a fabulous vacation or just some needed time off from work, I encourage you all to register for membership for the 2017/2018 year. All the necessary information regarding renewal is on the MDRAO website. The price for membership has not changed and there is much to gain from being a registered member of this great organization. We ask that you sign up as early as possible so you could continue to receive up to date information through e-mails.

To date we have received a cheque from the Provincial body for educational and membership rebate. Some of the money will be utilized to offset the cost of sending a few members to the MDRAO Conference in September. **Please indicate if you are interested and able to attend this year's Conference. Not everyone can attend but we will make sure those with excellent meeting attendance gets first chance.** Our balance in the chapter account to date is \$11,033.

For this new membership year we will be planning meetings with Vendors as usual, as well as a possible Education day in 2018. Meetings will continue to be on Saturdays as we seem to be the most successful during these times.

At the beginning of my Presidential term I did ask if there were any processes within your Institution that you were having difficulties with, so we could get the proper information to you and thus improve the protocols of Reprocessing in your facilities. There are always ongoing changes and updates in the industry that warrants changes in our policies and procedures and the way we practice our profession. Please e-mail any procedures that you are having difficulties with and our expert executives will be more than happy to help you better understand and implement these changes in your Hospitals.

We do hope you and your families will have a safe and happy Summer, see you in September.

Regards,

Rohan Jagasar
